Not illustrated. 1906 Excerpt: .the mercury rises, establishes contact with the wire and a current which acts on the register passes; at the same time an electro magnet set in action by the same current raises for an instant the tube, the current is thereby interrupted, and the whole returns to the primitive conditions ready to receive again. Scloemilch Revealers.--This bases its action on phenomena not yet thoroughly understood, which presents itself when a very fine platinum wire serves as an anode in a voltameter, with dilute acid, to which is applied electro-motive force barely superior to that necessary to produce electrolysis. In such a case a very weak current passes, which, however, increases instantaneously when the apparatus is stricken by the electric wave. A telephone inserted in the circuit indicates by its sounds these augmentations of the intensity of the current corresponding to the arrival of the waves, and...
