

## Integration, Coordination and Control of Multi-Sensor Robot Systems (Paperback)

By Hugh F Durrant-Whyte

Springer-Verlag New York Inc., United States, 2011. Paperback. Book Condition: New. 235 x 155 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Overview Recent years have seen an increasing interest in the development of multi-sensory robot systems. The reason for this interest stems from a realization that there are fundamental limitations on the reconstruction of environment descriptions using only a single source of sensor information. If robot systems are ever to achieve a degree of intelligence and autonomy, they must be capable of using many different sources of sensory information in an active and dynamic manner. The observations made by the different sensors of a multi-sensor system are always uncertain, usually partial, occasionally spurious or incorrect and often geographically or geometrically incomparable with other sensor views. The sensors of these systems are characterized by the diversity of information that they can provide and by the complexity of their operation. It is the goal of a multi-sensor system to combine information from all these different sources into a robust and consistent description of the environment. Softcover reprint of the original 1st ed. 1988.

### Reviews

*Very helpful to any or all category of folks. It is written in simple phrases rather than difficult to understand. It has been developed in an exceptionally simple way and is particularly just after I finished reading this pdf in which basically transformed me, modified the way in my opinion.*
