## Computer algebra notes

By CHEN YU FU

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 251 Publisher: Higher Education Press Pub. Date :2009-1-1. Computer algebra is the study of symbolic computation algorithm design, theoretical analysis and computer implementation of the subjects. This book introduces the basic knowledge of computer algebra, algorithm and its theoretical basis. The main contents include the number of basic operations with polynomials, modular arithmetic, sub-resultant chain structure, the greatest common factor and a polynomial factorization algorithms, feature set method, gr6bner-based, real algebraic number of operations, the real closed field quantifier elimination and on the form of points and so on. This book focuses on the classic method of presentation, and use simple language explanation of the mathematical theory of algorithms. This book can serve as institutions of higher learning in mathematics and computer science graduate students and high school textbooks, but also for other professional researchers and engineers to provide a reference. Contents: Chapter 1 Introduction 1.1 Introduction 1.2 computer algebra computer algebra system, computer algebra system maple History 1.3 Introduction 1.4 describes the algorithm for some of the terminology and notation, a second chapter exercises and basic...
