

## Corrosion Inhibition of Aluminium in Hydrochloric Acid by Natural Plant Extracts

By Vijay Ram et al.

GRIN Verlag GmbH Sep 2014, 2014. Taschenbuch. Book Condition: Neu. 211x151x6 mm. Neuware - Research Paper from the year 2014 in the subject Chemistry - General, grade: 3, , course: MSc, language: English, abstract: Aluminium, being a highly reactive metal, corrodes rapidly in acidic (pH 6) and alkaline (pH 12.5) media. Hence it has to be protected when it is likely to come in contact with such solutions, e.g., during cleaning or acid pickling. One method of protection is the addition of inhibitor to the corroding medium. In the present work, ethanol extract of *Azadirachta indica* and *Murraya koenigii* leaves have been investigated as corrosion inhibitor for aluminium in aqueous hydrochloric acid. The corrosion of Aluminium in plain hydrochloric acid, as well as inhibited, is found to increase with a rise in temperature. Thus in uninhibited 0.5 M HCl the loss in weight due to corrosion for an exposure period of 60 min increases from 736 mg/dm<sup>2</sup> at 35°C to 852, 922, and 958 mg/dm<sup>2</sup> at 45°C, 55°C and 65°C respectively. In inhibited 0.5 M HCl containing 1.30% of *Azadirachta indica*, it was observed that at 35°C and for an exposure period of 60 min *Azadirachta indica* confer 100.0% protection....

### Reviews

*This is actually the finest ebook i have got study till now. I actually have go through and that i am sure that i am going to likely to read once again once again later on. Its been developed in an extremely straightforward way and is particularly simply soon after i finished reading through this ebook through which actually modified me, change the way i really believe.*
