

Annual Report Volume 29, V. 2

By New York Dept Of Health

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 296 pages. Dimensions: 9.7in. x 7.4in. x 0.6in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1909 edition. Excerpt: . . . in showing the effect upon the waters of Kayade-rosseras creek of the various wastes discharged into it. Samples Taken from Saratoga Springs Storm Water Sewer In the chemical sample taken at the mouth of the storm water sewer, the high chlorine figure would suggest the discharge into this sewer of domestic sewage. The odor is consistent with that found at the manhole below the gas works and points to the pollution by tar and oily matters which are introduced during the flow through the yards of the gas works. The two bacteriological samples, one taken at the mouth, of the Saratoga Springs storm water sewer and one at the first manhole above the mouth of the sewer, are as consistent as could be expected from the consideration of the different conditions under which the two samples were taken. The interpretation of both the bacteriological...
